

# Future Racer # \_\_\_\_\_

## Bump Table (2d6 + Modifiers)

-4	Attacker Crash
-3	Attacker 1d6 Damage across HR,GR,AR,PR
-2	Attacker PR -1
-1	Attacker GR -1
0	Attacker HR -1
1	Attacker Turned 30° away
2	Attacker Flameout
3	Racers Lock
4	no effect
5	Defender Turned 30° away
6	Defender Bumped 1-3 inches
7	Defender HR -1
8	Defender GR -1
9	Defender AR -1
10	Defender PR -1
11	Defender Flameout
12	Defender HR -2
13	Defender GR -2
14	Defender 1d6 Damage across HR,GR,AR,PR
15	Defender Crashes

## Bump Modifiers (total all modifiers)

	<b>Attacker</b>	<b>Defender</b>
Fail Avoid Roll	-2	+2
HR Damage	-row	+row
Bumped This Turn	-1	+1
GR Damage	-x (total damage to GR)	+x (total damage to GR)
Pilot Rating	+ attacker	- defender

### Turn Sequence:

One card per racer, draw a card, move, reshuffle after last card is pulled.

### Skill Checks:

**PR Check:** ≤ Pilot Rating on 1d6

1 is automatic success, 6 is automatic fail

**Movement:** (total = Current Speed + Modifiers) in inches.

1/2 in straight line, then can turn, must use all movement.

First Row: low gear (Cur Speed + 1d6)

Second Row: high gear (Cur Speed + 2d6)

Cur Speed increase/decrease by AR

**Turn:** (GR + PR) - Cur Speed = # of 30° turns

if negative, need to stress GR with PR check. -1 GR if PR Check fails.

If turn opposite direction from a previous turn in phase then expend an additional turn point.

**Bump:** if involuntary, both sides may try to avoid.

if not, defender must pass PR check to avoid or just take the hit.

Moving racers lose 1 inch of movement from bump.

**Locked Bump:** (two locked racers hitting a 3rd racer)

1/2 move straight, 2d6 ≤ total PR to unlock

3d6 plus modifiers against 3rd racer on Bump Table

If result is against locked racers, assess damage to

both.

**Head on Bump:**

3d6 by each player against the other racer.

### Flameouts:

Each turn decrease Cur Speed by 4 until pass PR Check.

**Afterburners:** (+1d6 to movement)

PR Check, if fails -1 to AR.

**Loose Object:** (within 1 inch in front at begin/end of turn)

PR Check attacker to hit, PR Check defender to avoid.

If attacker succeeds and defender fails then flameout.

**Airborne:** (off ramp on race course)

+50% movement, PR Check and ≤ GR on 2d6 to land successfully

**Collision:** (with course, not another racer)

PR Check for each inch into object. -1 per each inch past first inch, cumulative.

Any failure take 1d6 HR dam and continue checks.

**Any Rating Goes To Zero:**

PR test for pilot to survive crash.

**Random acts of violence:** (snipers at selected locations)

Roll 2d6, any dbl is a hit. If hit roll on Bump Table (use def modifiers only)

### From the "No Holds Barred Texas rules"

#### Flameout Table (Optional) 1d6

<b>Die Roll</b>	<b>Result</b>
1	Left Engine Fails, Break 60° left.
2-5	Both Engines Fail, Continue Straight
6	Right Engine Fails, Break 60° right.

#### Ranged Weapon Table (Optional)

Hits on Att PR Check, Saves on Def PR Check

Damage is 1d6 spread over HR, GR, AR, PR

<b>Range</b>	<b>Att Modifier</b>	<b>Def Modifier</b>
0 - 9 inches	n/a	-1
9.1 - 18 inches	-1	n/a
